Smartphone Microscope

Editado por Cured.Bio

Versión 0.1.2

Barcelona, 2018

Para el ensamblaje del *Smartphone Microscope* no se necesitan herramientas. Su ensamblaje lleva entre 10 y 15 minutos y puede ser fácilmente desmontado.

No obstante, es posible establecer una estructura fija, se recomienda añadir algún tipo de cola adhesiva en las zonas marcadas como  .

Como adhesivo, se recomienda usar cola blanca, hot glue o resina epoxy.

Es importante asegurarse que algunas zonas estén bien unidas. Dichas uniones, se hallan marcadas con  .

PASO 1

Hay que asegurar que ambas piezas están alineadas, formando una cruz, y que están correctamente encajadas.

IMPORTANTE: La tuerca debe quedar totalmente plana.
